

## JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora started out on a cross country excursion in their RV. Recently retired, after spending numerous years working with his brother to develop their crane company into an industry leader, John had no idea that momentous trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road expedition.

During their journey, John reacquainted himself with previous business acquaintances along the way. In combination with these conversations and a significant event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered an infinite market for a product that could quickly and securely elevate people in the air to accomplish maintenance and other building functions.

After returning from their holiday, John set up a business with two of his friends and purchased a metal fabricating company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty employees, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates many of the basic design elements of that original lift into existing models.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove came back from his fatefull cross-country journey and since the first JLG aerial platform entered the market. As of today, the company has extended itself into a number of global marketplaces and continues to develop contemporary machinery to ensure that customers are able to become safer and more efficient within their workplace.
