

## Aerial Work Platform

Aerial Work Platforms - There are various forklift accessories available on the market. They can help transform your forklift so that you could expand your ability to pick objects up or accomplish clean up jobs and material handling with less effort.

Several of the attachments are specially designed to fit on the forks themselves. Fork extensions for instance, are used when you need more blade length, which increases lifting capacity. Fork extensions come in lengths varying from 48-120 inches. Rounded or triangular attachments are another type utilized whenever transferring rolled material in order to make sure it does not roll off of the standard flat forks.

Examples of lifting accessories include pivoting and telescoping boom or crane accessories. They can come in a number of different kinds and are usually designed for moving metal bars, lumber, poles and other sort of bulky things. Additional accessories such as different styles of hooks and hook plates are obtainable to be able to pick up stuff utilizing a sling or chain. Slab lifters and magnetic lifters are other stuff which could be utilized together with hook attachments. Slab lifters are specialized accessories that are utilized for carrying a variety of materials which are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools which connect to your lift truck in order to make transferring rolls of carpet much easier. The accessory hooks onto the lift truck's blades and has a pole which goes through the middle of the carpet roll.

There are several types of lift truck attachment meant for facility maintenance like for example snow blades. These industrial blades can be connected to front end loaders and meant for transferring materials like for instance mulch, snow as well as dirt. Other popular cleanup attachments consist of standard sweepers and magnetic sweepers. Standard sweepers includes a broom which the lift truck forks connect onto for sweeping big spaces like for instance factory floors, parking lots and warehouse. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in areas where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths as much as sixty inches and this surface area makes clean up quick and simple.

A material spreader is another forklift attachment which is usually used at facilities. These spreaders are useful for a range of applications like for instance spreading pellets, fertilizers, insecticides, seeds, ice melt and rock salt.

Another optional lifting accessory are work platforms. These can be used by many different businesses everyday. Platforms may vary in size from 36" x 36" to up to 60" x 60". Some models may be accessible and are capable of folding up and storing into a smaller place. Work platforms are designed to raise employees up to an overhead location with the use of the forklift. Larger platform models have additional space for employees to bring tools and other essential items meant for the task. Often work platforms are made of poly material or steel.
